

S. Carolina Health Disparities: Prevalence of Mammography/CBE (Past 2 Yrs), Women 45-64

Source: DHEC BRFSS

** Question not asked on 2001 or 2003 BRFSS

- Percentage of women age 45 to 64 who received mammography/CBE has slightly increased from 1995 to 2004.
- Blacks continue to have significantly smaller proportions of women receiving mammography/CBE (Y2004 WF:BF Relative Ratio = 1.06).
